

They Can Work Hard

Villagers always try to cultivate something. Most of them are self-sufficient of their foods. Cultivated something with using compost and without any chemicals. They no need to keep the prepared food in long time in refrigerator or oven. Because when they want them, get their home garden picked them and cooked. Fresh food and fruit are always used. That is the reason why they are healthy. Otherwise always avoided to use the machines, primitive tools are used. That is better exercises for the body. I show you a faddy field. Now it is ready for harvest.

APaddyField

The real time to harvest

The villagers are very support full. The family members, friends and relations gather to the field and harvest like this, no need any machines they have lot of man power, & primitive tools. Work together like this & share the everything.
